

Mobile home/camper

For expeditions and excursions or simply having a good time.

Based on IFA L60, 1989.

Technical data:

- cubic capacity: 9,2 l
- 6-cylinder-in-line-engine
- 180PS. Maximum speed: 110 km/h.
- weight empty: 8 t
- synchronised gearing
- locking devices all around the vehicle for most difficult ground
- power steering

A small extract from the many reconstruction and rebuilding features:

- an additional generator with separate batteries supporting the 12-Volt-power-supply
- a diesel tank (500 l)
- protection sheetings (removable)
- bigger tires
- original lorry-honk
- Rockinger trailer coupling

Interior and exterior decoration:

- parquet floor
- stationary bed (200 x 240 cm)
- gas-facility (50mbar) combined with two 11-kilogram-gas-cylinders
- a fridge, freezer inclusive
- a gas range, made of high-grade steel
- a kitchen-sink, also made of high-grade steel
- water tank (300l)
- external shower
- charcoal-furnace with a stove pipe made of high-grade steel.

It's more pleasant and saves more energy than traditional stationary heating systems.

- even a mosquito net, an awning, a mobile toilet, much storage space for tables, chairs, grill and so on and so on.
